1 See Table 13.7: Formations that Comprise the Impulsion Consciousness of Unwholesome Mental States.
2 Factors present in the mind-door adverting process must match those in determining consciousness.
3 Factors present in the second set of seven impulsion consciousnesses must match those in the previous set of seven impulsion consciousnesses.
4 Factors present in the second set of two registration consciousnesses must match those in the previous set of two registration consciousnesses.
* These factors are variable—they may or may not be present where indicated. Their presence or absence accounts for the variable number of factors for some of the consciousnesses. If a variable factor is present at the start of the series, it will be present for the remainder of the series—if absent at the start of the series, it will continue to be absent.
